

Risk ID	Risk Description	Asset	Risk Owner	Threat
1	Data breach of customer information	Customer Database	IT Manager	External Hackers
2	Server downtime due to hardware failure	Company Server	IT Operations Manager	Hardware malfunction
3	Unauthorized access to sensitive data	Financial Records	CFO	Insider Threat
4	Phishing attack leading to credential theft	Company Emails	CISO	Phishing Emails

Vulnerability	Impact	Likelihood	Risk Rating (Impact x Likelihood)	Risk Treatment
Weak password policy	High	Medium	High	Improve password policy, enforce multi-factor authentication (MFA)
Outdated hardware	Medium	Low	Medium	Upgrade server infrastructure, introduce redundancy
Lack of role-based access control (RBAC)	High	Medium	High	Implement RBAC, log all access to sensitive data
Lack of employee awareness	High	Medium	High	Conduct phishing awareness training, install email filtering

Controls Implemented	Residual Risk	Risk Monitoring Frequency	Review Date
MFA, Strong Password Policy	Medium	Quarterly	01-10-2024
Redundant servers, Cloud backups	Low	Monthly	15-11-2024
RBAC, Access Logging, DLP	Medium	Quarterly	20-12-2024
Training, Anti-phishing tools	Low	Quarterly	05-01-2025
